BETTER MARKET FOR STOCKS

Shares Jumping Upward on the New York Exchange.

Money Easy, Gold Returning and Currency More Plentiful-Local Grain Market Unchanged.

At New York, yesterday, money on call was easy at 2@412 per cent, the last loan be-

ing made at 2 closing offered at 2. Prime mercantile paper, 8@12 per cent. Sterling exchange was strong, with actual business in bankers' bills at \$4.86@ 4.864 for sixty days, and \$4.824 @4.824 for demand. Commercial bills \$4.81% @

4.82; posted rates \$4.82 4 @4.87. Silver certificates at 78c. Bar silver closed at 73c per ounce. At London the closing price was 33%d.

The speculation on the Stock Exchange at New York was characterized by a buoyancy, upon which occasional small bear raids and realizations by room traders had no more than a fleeting effect. At the opening the dealings were slightly feverish and prices were irregular, but a strong buying movement was quickly developed, and under its influences a higher range of val-ues was steadily established. This upward tendency of the market was stimulated in some of the specialties, notably Sugar, by favorable news, it being announced early in the day that the executive committee of that trust bad recommended the declaration of dividends of 3 per cent, in the common and 1% per cent. in the preferred. Lead was also strong on reported favorable contracts made by the company, but the chief efactor, as on Saturday, was the increasing confidence of the stability of the monetary situation. Money on call was easy, and time loans could be negetiated upon favorable terms. Gold was returning from abroad and currency from interior. All the conditions were fa- | Stark, \$19.50. vorable to a bull movement, and, as if to help their old-time enemies, the bears ran to cover, seeming to feel that the present was not a time to be caught short of a long line; or even of a very short line of stocks. Therefore, what with the heavy buying for the long account, the by no means insignificant purchases cover short contracts and some fairly large orders from abroad, prices jumped up by longer steps than usual, the transactions were in greater volume than for some time, and the floor of the Exchange presented a scene of activity to which it has long been a stranger, upon a rising market. The industrials led in the dealings, and of these Sugar was the most sctive.

Railroad bonds were in sympathy with the share market and recorded advances ranging from to h per cent., the latter in general electric debentures. Government bonds were strong and

higher. Nothing was doing in State bonds. Closing quotations were:

LCCAL GRAIN AND PRODUCE. Trade Good and Prices, as a Rule, Steady-

No Session of the Board of Trade. While it was the intention of the wholesale men to make yesterday a semi-holiday, so large a number of people were in the city that many of the merchants dropped in and bought bills, making trade most of the day brisk. Poultry has dropped to 7 cents a pound, and is weak at that figure. Provisions are weeker as compared with prices of last week. On Commission row it would be difficult to quote prices, as dealers were selling everything which came in at about the prices of some days | 55c per box.

There is no change in the grain markets, the Board of Trade holding no session. Wheat-No. 2 red, 58c; No. 3 red, 53c; rejected by sample, 40@50c; wagon, 57c. In making over old black silk dresses do not use a hot iron on them. Sponge the pieces with a large sponge dipped in clear coffee, and then fold and lay away under a pressure as heavy as possible. The silk

will come out looking almost like new. Whisky will take out every kind of fruit stain. A child's dress will look entirely ruined by the dark berry stains on it, but if whisky is poured on the discolored places before sending it into the wash it will come

MARKETS IMPROVING

Wheat and Corn Up 1c at Chicago Since Last Saturday.

Trading Influenced by the Better Financial Outlook-Oats and Provisions a Trifle Higher.

CHICAGO, Sept. 5 .- There was what almost amounted to buoyancy in the wheat market to-day, and corn was strong. Since Saturday each article has improved about a cent per bushel. The buil fraternity bad almost ceased to look for the possibility of two consecutive bull days, but they had many points in their favor, chief among which were the big exports, a decrease in the visible and a large reduction in the previous estimates of the French crop.

Another point was the continued brightening up of the financial affairs. The reports of the corn crop are far from resssuring, and that caused today's advance, notwithstanding heavy receipts. There was no new feature in provisions. It was still what the traders call an Armour mar-

ket. Wheat, at the opening, was about 18 @ 40 lower than Saturday's closing, became strong and prices were advanced 5sc, then eased off %c, again ruled strong, prices advancing 14c more, held quite steady, and the closing was about 14c higher for Sep-tember and 1c higher for December than

closing figures Saturday. In corn, opening trades were at a fraction-al decline, influenced by the large receipts and favorable State reports of lows and Kansas, but the demand was urgent, many of the larger bouses having good buying orders, and the price was put up 1@1'sc, on the distant, and %c on the near futures. Oats moved in sympathy with corn, and prices advanced 4 @ sc. and closed steady

at about the top prices. Provision stocks are so small that the market is easily controlable. Outsiders keep it in mind and stay away. Prices were advanced a trifle, except for October pork and October ribs, which are, respectively, marked down .30c and .124c.

Estimated receipts for to-morrow Wheat, 190 cars; corn, 900 cars; oats, 580 cars; hogs, 20,000. The leading futures

ranged as follows:

Receipts-Wheat, 82,400 bu; corn, 12,900 bu; oats, 16,000 bu.

Dry Goods. NEW YORK, Sept. 5 .- The recurrence of holiay has interfered in course of business, with the dry-goods market somewhat. Mail orders, however, continues to arrive in increasing numbers. Cotton goods are holding their own, particularally the bleached goods, the buyers paying more attention to the low medium grades in 3-4, 7-8 and 4-4 forms. The assortment of cotton goods is not complete, nor is the supply very ample, with 6 to 612c make absorbed as fast as they come from the bleacheries. Cotton fiannels rule quiet but steady. The demand for prints and printed fabries is taking better form as to extent and generality. Out of town distribution is very fair, with an increasing business in the Southwest. Business in printing cloths is on a steadily improving basis, with the last sales at Fall River in 61 by 64, 28-inch makes at 23 c, which is now bid and refused. Dress goods rule quiet but steady with signs of improvement in both staples and fancies. Woolen goods show continued evidences of increased activity without another change in price.

Foreign dry goods rule inactive. OIL CITY, Sept. 5.-National Transit certifi-cates opened at 604c; highest, 61c; lowest, 60 he: closing, 60 se. Sales, 16,000 brls; runs, 68,529 bris; clearances, 40,000 bris; shipments,

Simple Remedies. New York Ledger. Whoever gives profound study to that passage of Holy Writ that says that the leaves of the trees are for the healing of the nations must have wondered why it is that the root-and-herb doctor, who formerly was so much the fashion, has come to be spoken of with sentiments akin to contempt, and the "old woman's remedies," which were for the most part of the simples of the field, have fallen into such disrepute. It must be that the white light of scientific research has withered the herbs and leaves, and that the old woman, lacking the ability to give the chemical properties of her concoction, has come to be regarded as a little bit of public confidence. Certain it is, however, that the simples of life are in many cases much more effective than the highly concentrated elixire, triturations and fluid extracts of the modern laboratory, and often give relief when the re-sources of the medical profession have been

exhausted. The man who dipped seven times in the Jordan may have been healed by simple bathing, and those who seek a remedy for their ills in the leaves of the forest, have only gone back to the first principles of

It is a noteworthy fact that this science has made less progress during the last hundred years than almost any other; indeed, medicine and theology are the two laggards in the race for improvement. Tradition hampers both, and bigotry is as rampant and as ernel in the one as in the other. The average physician of the day would sneer at the ideas of cures performed by some of the simple remedies known to every household, and probably would dispute the efficacy of such applications. He would be unwilling to admit that the cranberry is an almost sovereign cure for certain forms of erysipelas and that grated potato has cured cases of rheumatism that have for years bailled the skill of physicians. This latter remedy, by the way, is much more efficacions than those who have never tried would be willing to believe. It is only necessary to grate or crush the potato to a pulp. or, in the absence of other means, slice it very thin and apply in the form of a poultice to the affected part. It is not claimed that it will eradicate the disease from the system, but that it gives instant relief, and is, in certain families, in regular use for this pur-

The Farmer's Cow.

From many sources the statement is made that the thing that operates against the dairyman is that the cow he milks is, taking an average, a poor one, and high yields are impossible. But then the other question comes up, how comes this dairyman milking such a poor cow! As has been pointed out time and again in this paper, the dairyman has it in his power to elect the kind of a dairy he wants. The cow, her breeding, her yield and cost of feeding. the farmer has all in his own power of betterment, and the farmer's dairy, breeding, feeding and yield are reflections of his dairy intelligence. That a man's dairy only makes 125 pounds of indifferent butter and a neighbor over the fence has a dairy, and a farm of no better producing soil, that makes 250 and often better of butter, is the proof that the man must first be improved before great results can be looked for from his herd. There is no danger of overproduction in dairy produce until there is a general upheaval of the dairy world in general. The Gospel is being accepted in greater proportion than new dairy truth, and it has been centuries even since Luther's reforms were promulgated. The average dairyman must in some way be roused from the state that quietly accepts a cow that only gives an annual yield of three thousand pounds. By the time the dairy would be fully awake the demand for tine dairy goods will be a long way in advance of the supply. Preach. teach and hope all the time for dairy re-

Hartford Courant. Celery plants that are set between the corn rows will thrive, no matter how hot the sun. They crave the shady, cool places. When set in the open they should be protected from the sun's rays. This may be done where there are only a few hundred plants for home use by placing boards along the sunny side of the rows-the rows of course being set east and west in the shape of a "lean-to." That is, take any old boards that are of suitable width-say a foot wide-nail a couple of supports, perhaps eight inches long, to one edge of the board; place the edge of the board a couple of inches away | riety of from the plants and let it rest upon the supports. The roof may be laid off nights with little trouble, although it is not a necessity only as giving the plants a better chance to breathe the dew-laden air. If it chances to rain while the "root" is on

Growing Celery.

ordinary plan. Farming on a Large Scale,

the water is landed within reach of the

roots, the plants are not temporarily

drowned, nor is the earth washed over

them, as is frequently the case with the

Philadelphia Inquirer. The Germans, as a people, are progressive, and not less so in agriculture than in other lines of employment. They have recognized the value of capital and business management in the conduct of agricultural enterprises, and so have applied principles of practical co-operation. Capitalists have joined together and purchased large areas of land, or rented many farms lying together, with the privilege of buying them at the end of an agreed time. Upon this basis they form joint stock companies, and go largely into special industries, such as growing beets and making sugar, growing potatoes for starch and alcohol, supplying the Paris market with | doctrine. sheep, etc. Having plenty of capital, they can buy everything at first hands, and so at the lowest prices, and in selling they have the advantage of large shipments, which enable them to choose their market. It is to the detriment of our modern farming that each man works, buys and sells alone, while in other trades men work together.

How to Make Cheap Pork.

Correspondence National Stockman. It is worth while for a man to study economy in the production of his pork in these times of small margins, always bearing in mind that a ponny saved is as good as two earned. I have tried for forty-five years to reduce the cost of pork production, and I think I have come off conqueror. I have my pigs to come the last week in February or first week in March, and I boom them from the start, feeding them much and ceipts, 8,800; shipments, 3,800. Best catsweet milk along with bran slop, and have them to run in clover in the orchard, where they get the falling apples. I usually kill between Thanksgiving and the holidays. and my pigs average about 300.

The white of an egg with a little water of 357.000 bu; corn. 5,547,000 bu, an increase Market opened 10@20c higher; closed 5@15c and sugar is good for children with irritation of 178,000 bu; cats, 3,538,000 bu, an increase lower; bulk, 85.10@5.65; heavies and pack- ble stomache.

PROPERTY THE SERVICE S

Daily, Sunday and Weekly.

The Journal is first of all a newspaper. Its primary object is to pub lish the news, and to secure this it spares no pains or expense. Besides the service of two great news agencies, which cover foreign countries as well as the entire United States, it has a corps of Special Correspondents, who give attention to those events and occurrences that are likely to be of particular interest to the Indiana public. Its Washington bureau was established for the purpose of looking after matters in which the State and its people are concerned, and is under the management of an Indiana man well acquainted with the local business and political issues. It has a correspondent in every town of importance in the State, and is constantly increasing its facilities for obtaining information from every quarter. Its staff of city reporters is large, and its local departments are unexcelled. As a newspaper it is far better equipped than any other in the State, and welcomes comparison with its contemporaries in any and all of its departments. With all it endeavors to be accurate and trustworthy, printing the news, whatever it may be, without personal or partisan bias.

But while the Journal is non-partisan as to news, it is a Republican paper, and sets forth Republican principles. It is important that the people shall read the truth about these principles, and it was with the object of putting everybody in the way of doing so that the price of the

DAILY JOURNAL

----Was reduced to---

15 CENTS A WEEK.

No other method of securing a Republican victory at the polls is so certain as the circulation of Republican papers among voters. Since the reduction in price thousands of subscriptions have poured in from all parts of the State, showing that a need was supplied. In order to have the proper influence and effect upon voters seeking for trustworthy information the Journal should go into their hands at once, and not next spring or summer. Clubs are being formed and agencies established wherever daily mails reach and as rapidly as traveling agents can visit the places, but Republicans in each and every locality cannot do their party

THE SUNDAY JOURNAL

greater service than to interest themselves in circulating the Journal.

Is a paper that gives more attention to miscellaneous literature than the other editions, and contains in its sixteen, and often twenty, pages a va

CHOICE READING MATTER

Reduced rates to clubs.

That satisfies the most exacting taste. The same reasons that call for the immediate extension of the daily circulation apply to the weekly. This is carefully edited, with a special view to the wants of Indiana readers, both in its general and political news. Its subscription price, \$1, with reduction to clubs, places it within the reach of all, and no campaign contribution can be so effective as when spent in furnishing this paper to readers who need Republican
